The 2017 Natural Gas for High Horsepower (HHP) Summit Announces Early Bird Registration and Executive Speaker Highlights

Early bird registration opens today for the 2017 HHP Summit, which will convene industry leaders from the marine, mining, rail, E&P, and power generation sectors, November 6-9 at the Prime Osborn Convention Center in Jacksonville, Florida.

JACKSONVILLE, FL— July 13, 2017 — Conference organizers of the 2017 [High Horsepower \(HHP\) Summit](#), North America's largest event focused on the economic and environmental benefits of natural gas for high horsepower applications, today announced early bird registration for the sixth-annual event. The event showcases the innovative and growing use of natural gas – in both its liquefied (LNG) and compressed (CNG) form, across a wide variety of energy-intensive downstream applications, including rail, marine, mining, E&P, and power generation.

“In the last 12 months, transformative growth has swept the North American natural gas market for high-fuel-use applications,” noted Erik Neandross, CEO of Gladstein, Neandross & Associates, the U.S. clean transportation and energy consulting firm that produces the conference. “Nowhere is this more evident than in Jacksonville, Florida, where LNG and CNG projects are hitting the water, tracks, and gravel month-after-month.”

HHP Summit 2017 attendees will have the unique opportunity to participate in off-site technical tours to see this incredible market activity firsthand. In the months leading up to HHP Summit, Jacksonville will become home to more LNG-fueled ocean-going vessels, locomotives and over-the-road trucks than any place in the world, as well as the launching point for the export of natural gas to remote power generation and industrial markets in the Caribbean and beyond. To support these operations, three new LNG production plants are under construction, including a state-of-the-art facility from six-time HHP Summit presenting sponsor, Pivotal LNG.

The Summit will provide insight into real-world natural gas project deployments during comprehensive educational sessions and workshops. Confirmed executive level speakers include:

- Thomas Crowley, CEO & Chairman, Crowley Marine
- Peter Keller, Executive Vice President, TOTE
- Marcel LaRoche, Director, LNG Engineering, BC Ferries
- Svein Steimler, President & CEO, NYK Group Europe
- Tom Strang, SVP, Maritime Affairs, Carnival
- Chad Verret, Executive Vice President, Harvey Gulf

Additional speakers, a detailed agenda, and co-located events will be announced over the next several weeks.

Early bird registration offers attendees a \$400 savings through August 4. For more information, visit www.hhpsummit.com.

About the Natural Gas for High Horsepower (HHP) Summit

HHP Summit is North America's largest and most comprehensive conference and expo focused on the economic and environmental benefits of natural gas for marine, mining, rail, drilling, pressure pumping, and remote power generation operations. Since its inception, the HHP Summit has served as the official meeting place of high horsepower industry stakeholders to discuss the opportunities and challenges offered by natural gas in high-fuel use operations, in both compressed and liquefied form. Working together with our event stakeholders, the [Gladstein, Neandross & Associates \(GNA\)](#) team creates the HHP Summit program, drawing upon insight gathered from more than 20 years of clean transportation and energy consulting experience.

About Gladstein, Neandross & Associates (GNA)

GNA is the leading North American consulting firm specializing in market development for low-emission and alternative fuel vehicle technologies, infrastructure and fuels for both on and off-road applications. For more than 20 years, GNA has pioneered the nation's largest and most innovative alternative fuel projects in the on-road and off-road sectors. In addition to its technical consulting practice, GNA hosts North America's leading alternative fuel and advanced vehicle technology conferences—including the Advanced Clean Transportation (ACT) Expo, the Rethink Methane Symposium, and the High Horsepower (HHP) Summit. www.gladstein.org
