Agenda Announced for 2014 High Horsepower (HHP) Summit

HHP Summit will highlight end-user success stories and real-world economic data for current projects in the emerging natural gas for high horsepower market

SANTA MONICA, Calif.—June 10, 2014—[Gladstein, Neandross & Associates \(GNA\)](#), organizers of the 2014 [High Horsepower \(HHP\) Summit](#), today released the agenda for the third annual event taking place October 7 – 9 at the Ernest N. Morial Convention Center in New Orleans. Bringing together more than 1,500 natural gas stakeholders, HHP Summit is North America’s largest, best attended, and most comprehensive conference focusing on the economic and environmental benefits of natural gas for high horsepower operations—including marine, mining, rail, drilling and pressure pumping. To view the HHP Summit 2014 agenda in its entirety, visit www.hhpsummit.com.

“North American shale gas continues present multiple high horsepower industry segments with a ‘triple crown’ opportunity to significantly reduce fuel costs, improve environmental performance, and comply with important air quality regulations,” said Erik Neandross, CEO at GNA. “Our consulting firm is working on a number of market development and deployment initiatives with HHP stakeholders throughout North America, and we’ve put together this year’s HHP Summit agenda to really address the current challenges and opportunities that exist in these markets. Our goal is to share our inside perspective with end users from each HHP sector and provide them with resources and connections needed to implement their own projects.”

With a focus on peer-to-peer learning, HHP Summit 2014 will feature three days of end-user case studies on current natural gas pilot demonstrations and evaluations, allowing attendees to hear key lessons learned, project economics, technology used, and plans for the road ahead. In addition, the industry’s leading fueling, engine and technology experts will share the latest technology solutions available today and in development, as well as their perspective on the future of natural gas in HHP operations around the world.

Attendees will also have access to a sprawling expo hall featuring the largest display to date of the wide range of fueling, equipment, engine, technology and other products now available in the marketplace. Off-site technical tours to natural gas project facilities in the New Orleans area will also be offered, as will be hosted peer-to-peer networking events throughout the week.

RAIL • DRILLING • MARINE • MINING • PRESSURE PUMPING

2525 Ocean Park Boulevard, Suite 200, Santa Monica, CA 90405
phone: 888.993.0302 | fax: 310.396.3696 | web: www.hhpsummit.com

HHP Summit will host some of the top names and leaders across all high horsepower sectors – including Caterpillar, Chart, Pivotal LNG, Applied Cryo Technologies/Dragon, Cummins, Dresser-Rand, GE, Shell LNG, Westport, and others – for a closer look at how natural gas is revolutionizing the HHP industry. The full speaker lineup will be announced soon. Learn more at www.hhpsummit.com.

About Gladstein, Neandross & Associates (GNA)

GNA is the leading North American consulting firm specializing in market development for low-emission and alternative fuel vehicle technologies, infrastructure and fuels for both on and off-road applications. GNA provides strategic market analysis and planning, technical assistance, and public affairs and policy support to clients in the private, public and non-profit sectors. For 20 years, GNA has pioneered the nation's largest and most innovative alternative fuel vehicle projects, including the development of several successful clean fuel corridor projects. In addition to its technical consulting practice, GNA hosts two of North America's leading alternative fuel and advanced vehicle technology conferences—the Alternative Clean Transportation (ACT) Expo and the High Horsepower (HHP) Summit.
